

15. Further Recommendations

15.1 Coolumity Web Place

The establishment of a web site should be considered as a means of publishing this report and keeping key information relevant and open to new input. The structure of the web site would be determined by relevant staff within SCRC [place manager] and the vision pertaining to Coolum.

Considerations of this site would be

- The site to be a wiki or archive for community groups to lodge info from meeting 'minutes' to correspondence. This info can be accessed via a keyword search [as with Wikipedia] to preserve a record of what community action has happened and where or who it came from.
- Design, construction and maintenance by local young web designers [creating links with this age group].
- Suitable stories within this report could be run in conjunction with a monthly column printed in either of the local newspapers, to assist community buy-in and encourage, via example, more stories from the community.
- Providing current information with regards to SCRC activities within Coolum.
- Links between relevant groups, local and further afield.

15.4 Acknowledge current paths and maps
Coolum Area Parks Society produce the C.A.P.S. walk map this year as a follow on from its original walk book in 2001. The three paths in this report link with this map and other existing trails such as the Lions Park Exercise Trail.

15.2 Arthouse - Ambulance Centre Revitalisation

Creativity at Work

The 'Arthouse' concept is a community-based work and exhibition space for local artists, centrally located in Coolum Beach.

Coolum + Community = Coolumity

15.3 The Green Bridge - the car free path to school.

It is a pedestrian only short cut linking Coolum Primary School and the Noosa National Park entrance to Banksia Av. Crossing Stumers Ck, it is presently road reserve. this could become a pocket park.

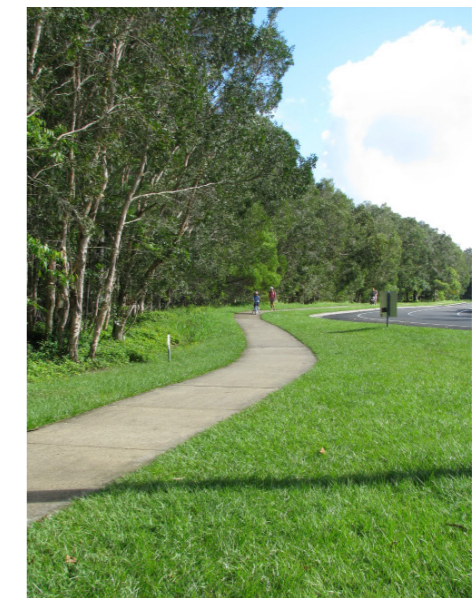

Place making opportunity.

- Support and build on the bike week initiative by Coolum Primary P&C to encourage walking and riding.
- Opportunity to create value in this place using art to attract parents while they drop off or pick up children.
- Opportunity to create value in this place using art to attract children while they wait for their parents to finish socialising.
- Alternative drop off for parents wishing to stay away from the traffic.

Long Term Concept Paths

Cassia Wildlife Corridor and Fourwinds Reserve have the potential to add to the paths network and be removed from the road system.

SCRC Materials Dump on Cinnamon Av has the potential to become a public park on Stumers Ck. - a better use of public space.
